

SKILLS

Unreal Engine 5
C++ · Blueprints · Network replication · Learning Agents (RL) · Behavior Trees

Unity
C# · Networking · AI

Tools
Git / Perforce · Unreal Insights · Steamworks

Familiar with
OpenGL · Vulkan · GLSL · Python · AWS · Pixel Streaming

LANGUAGES

French: native
English: C1 — TOEIC 990/990 (2026)

INTERESTS

Competitive water polo (7 years)
Electric guitar (5 years)
Games: Hades, Dredge, Chants of Sennaar, Elden Ring, Overwatch
Reading: manga, fantasy, sci-fi

PLATFORMS

PC (Steam) · PlayStation 5 · macOS

WORK STYLE

Remote since 2024
Teams of up to 20 people

Work Experience

Undead Battery — Gameplay & AI Programmer 2025 – 2027
Indie studio, team of 10 · **TrypFPV**: FPV drone simulator (Steam, 2021)

Fixed-term contract
Oct 2026 – Feb 2027

- Reworked drone replication: each client simulates its own physics and only receives the others' state
- Multiplayer debugging and small gameplay features
- Upcoming: realistic wind, synchronized in multiplayer

Internship, then work-study
Mar 2025 – Aug 2026

- Multiplayer gameplay features (UE5, C++)
- Steam API in C++ and a customizable player profile, unlocked through quests (not yet released)
- Restored the macOS builds
- Debugging and migrating Blueprints to C++ for long-term maintainability

COSMA (start-up) — Part-time internship, 3 months 2024

- Set up a UE5 Pixel Streaming environment hosted on AWS

CEA Grenoble, LEMMA — Internship, 2 months 2023

- Python tools for 4D electron microscopy, working directly with researchers

Projects

AI Drone Flight · Thesis, team of 3, with Undead Battery 2025 – 2026

- AI drone pilots trained with RL (Learning Agents) in the **TrypFPV** UE5 project, using the game's physics, on procedural tracks
- Two agents: **89%** of races completed without obstacles, **79%** with obstacles (200 runs each)
- Both agents integrated into an internal build and tested on the game's tracks

RollerLoop · UE5 racing game on PS5 · team of 20 2024 – 2025

- Dynamic third-person racing camera
- Integrated the PS5 plugin into Unreal Engine and compiled a custom engine build

The Forest Keeper · One-week game jam · Unity · team of 10 2023

- Self-sustaining forest ecosystem simulation

Education

Master's Degree in Game Programming 2021 – 2026
ISART DIGITAL, Paris · 5-year program · Graduated
